

Traditional Feng Shui Workshop

Feng Shui changes from place to place – and also changes in time. As of February 2004 we entered a new 20-year period in Feng Shui, which affected the health, wealth and harmony of many homes and businesses.

Have *you* noticed changes in *your* life?

In this two-part workshop you'll learn how to assess your own home and its relationship to the energies and principles associated with Feng Shui.

For the first class we explore what Traditional Feng Shui is all about, how to examine the external environment, and using your site map, we'll learn how these external features affect your home. Also includes your personal best directions, use of a compass, how to attract romance and much more!

For the second class, bring an accurate drawing of your house plan, the year of construction and an accurate compass reading for a traditional Feng Shui evaluation using the Flying Stars technique.

This is a unique way of presenting what traditional Feng Shui is all about; it's a bit like 'house astrology.' It's fascinating to see how Feng Shui affects us and we'll share case studies during the workshop.

Be prepared to have fun listening to all the ways Feng Shui has affected your life and others!

Workshop includes class notes, luopan compass and Feng Shui template.
